Introduction

Revision Date: September 29, 2022

This document describes the items deployed in the 22.3.0 CAMS Enterprise Update Release.

Enhancements, modifications, and system corrections are included and categorized primarily by module.

Those items needing CAMS Manager attention have been noted as such. For detailed information and instructions on functionality additions and changes, refer to the online help files located in the CAMS Enterprise application.

Note that portal updates are not automatically installed on your site and must be applied by your institution.

Actions Required

Important CAMS Manager Actions

The following important CAMS Manager actions are required:

Service Broker

It is necessary to re-register the Service Broker assembly required for web service access to CAMS Enterprise. The Service Broker Reg.bat file was updated in this release.

On the CAMS IIS Server, open an elevated Command Prompt window.

Change your current directory to the CAMS Enterprise Installation Path.

Change your current directory to CAMSServices\ServiceBroker and run reg.bat.

Type exit and press enter to close the Command Prompt window.

If portals are on a separate portal server, you must copy the CAMSServices\ServiceBroker\ServiceBroker.* **and reg.bat** files to the portal server's ServiceBroker folder (replacing the previous version). Follow the same steps noted above to register the Service Broker on the portal server.

Changes included in this release

Admissions

- Added sort and filter functionality to the Prospect Document Tracking User Interface. The sort and filter functionality were added to Student Document Tracking in CAMS release 22.2.0.
- Documents uploaded to a prospect are also listed in student's Document Tracking after prospect is transferred to a student.

Billing

- In Billing Batch, the comment field can include a tick (') symbol without giving an error.

CAMS Manager

- Resolved a glossary issue where the contact type and primary contact type in CAMS were being used to populate a single field.
- Fixed an issue that occurred when a glossary item with a tick (') symbol was added to the glossary table. Glossary items can contain a tick (') symbol without giving an error.
- Fixed the approval payment confirmation page after successful payment is approved by the PayPal Pay Flow Pro payment provider.

Financial Aid

- Updated ISIR import for 2023-2024 and Comment Code import can now take a CSV file. The 2023-2024 Comment Codes file is added to CAMS import folder (Import/Financial Aid/ISIR).
- Corrected a DateTime2 issue on COD export.
- Updated PowerFAIDS Import stored procedure, CAMS_FinAidPowerfaidsImportTextFile.sql, to cast a MM/DD/YYYY Transaction date as DateTime2(3)). The PowerFaids import file cannot have header record.

General

- Added Third Party Inventory report to CAMS. The link to the new report is located at the bottom of CAMS home page.

Health

- Added functionality to track COVID Vaccinations in Health module (Health > Maintain).

Housing

- Housing reports no longer contain duplicate records.

Portals

- Corrected Faculty Portal Directory.asp pictures page.

Registration

- Offering set up functionality works with datetime2(3) date format without any errors.
