THESIS CAMS

22.4.0 Release

Introduction

This document describes the items deployed in the 22.4.0 CAMS Enterprise Update Release.

Enhancements, modifications, and system corrections are included and categorized primarily by module.

Those items needing CAMS Manager attention have been noted as such. For detailed information and instructions on functionality additions and changes, refer to the online help files located in the CAMS Enterprise application.

Note that portal updates are not automatically installed on your site and must be applied by your institution.

Actions Required

Important CAMS Manager Actions

The following important CAMS Manager actions are required:

Service Broker

It is necessary to re-register the Service Broker assembly required for web service access to CAMS Enterprise if the release contains updates to the Service Broker code.

***No updates were made to Service Broker code in this release.**

On the CAMS IIS Server, open an elevated Command Prompt window.

Change your current directory to the CAMS Enterprise Installation Path.

Change your current directory to CAMSServices\ServiceBroker and run reg.bat.

Type exit and press enter to close the Command Prompt window.

If portals are on a separate portal server, you must copy the CAMSServices\ServiceBroker\ServiceBroker.* and reg.bat files to the portal server's ServiceBroker folder (replacing the previous version). Follow the same steps noted above to register the Service Broker on the portal server.

Changes included in this release

Admissions

- Corrected issues in the recently updated Create Student from Prospect process. The prospect's contact and activity information are correctly copied to the student and a new student record is not created when a student record with matching SSN already exists in the system.

Billing

- Students with holds can be selected to have billing changes recalculated using the Recalculate feature of the Authorize Unofficial Registration process in Billing > Authorize.
- Corrected issue with Alter Payment Plans. Expected data is now displayed in the grid.

Financial Aid

- Updated COD Message Class Import to handle updated layout of DSDF24OP Import file.
- Added 2024 to Program Year drop down on COD Export Criteria page.

General

- Some CAMS routines that were originally in COM+ code are being moved to new SQL Stored Procedures to improve the overall maintainability and simplicity of the system.

Portals

- Corrected Direct Grade Submit paging issue in the Faculty Portal.
- Corrected issue where documents downloaded in the portals were getting corrupted.

Tools

- Updated Kansas State Reports.
- Updated New York State Reports.
- Updated NSLC Report code.
- Format of Apply Texas import files changed. Updated Apply Texas Import parsing code to ignore new CR character that was added to each record.

SQL Object Changes

In this release, we have changed the following SQL Objects:

Functions

None

Stored Procedures

CAMS_DistributeABillingBatch.sql

CAMS_FinancialLimits_Check.sql
CAMS_Financial_Transfer_Elements.sql
CAMS_NSLCExportInitialize.sql
