Introduction

This document describes the items deployed in the 23.1.0 CAMS Enterprise Update Release.

Enhancements, modifications, and system corrections are included and categorized primarily by module.

Those items needing CAMS Manager attention have been noted as such. For detailed information and instructions on functionality additions and changes, refer to the online help files located in the CAMS Enterprise application.

Note that portal updates are not automatically installed on your site and must be applied by your institution.

Actions Required

Important CAMS Manager Actions

The following important CAMS Manager actions are required:

Service Broker

It is necessary to re-register the Service Broker assembly required for web service access to CAMS Enterprise if the release contains updates to the Service Broker code.

***This release contains updated Service Broker Code.**

On the CAMS IIS Server, open an elevated Command Prompt window.

Change your current directory to the CAMS Enterprise Installation Path.

Change your current directory to CAMSServices\ServiceBroker and run reg.bat.

Type exit and press enter to close the Command Prompt window.

If portals are on a separate portal server, you must copy the CAMSServices\ServiceBroker\ServiceBroker.* **and reg.bat** files to the portal server's Service Broker folder (replacing the previous version). Follow the same steps noted above to register the Service Broker on the portal server.

Action Following Portal Files Download

As part of this release, updated portal files will be downloaded to your CAMS Enterprise\Portal Updates directory.

If you do not (or have not yet) customized your portals, follow these instructions:

- MOVE all files from the CAMS Enterprise\Portal Updates\PortalName\ (Faculty, Student, etc.) to the installation directory for the matching portal. Ensure that you also move files from subfolders to the corresponding subfolder.

If you do customize your portals follow these instructions:

Make a backup of your customized portal pages.

- Move all files from the CAMS Enterprise\Portal Updates\PortalName\ (Faculty, Student, etc.) to the installation directory for the matching portal. Ensure that you also move files from subfolders to the corresponding subfolder.

Apply your customizations to the updated "stock" portal files.

Changes included in this release
