Introduction

NOTE: Portal updates are not automatically installed on your site and must be applied by your institution.

Important CAMS Manager Actions

This section includes items that require CAMS Manager attention.

For detailed information and instructions on functionality additions and changes, refer to the online help files located in the CAMS Enterprise application.

Service Broker

As part of this release, it is necessary to re-register the Service Broker assembly required for web service access to CAMS Enterprise as this release contains updates to the Service Broker code.

If portals are not on a separate portal server, follow these instructions:

- On the CAMS IIS Server, open an elevated Command Prompt window.
- Change your current directory to the CAMS Enterprise installation directory.
- Change your current directory to CAMSServices\ServiceBroker and run reg.bat.
- Type “Exit” and press enter to close the Command Prompt window.

If portals are on a separate portal server, follow these instructions:

- Copy the CAMSServices\ServiceBroker\ServiceBroker.* and reg.bat files to the portal server’s Service Broker folder (replacing the previous version).
- Follow the same steps noted above to register the Service Broker on the portal server.
